

DP672

Series 670 Intrinsically Safe Optical Smoke Detector

General

The DP672 is an intrinsically safe, optical smoke detector and forms part of the 670 series of intrinsically safe conventional detector line.

The DP672 is regarded as particularly suitable for smouldering fires and escape routes as its performance is good in black as well as in white smoke. The device is designed to reduce the incidence of false alarms through over-sensitivity to transient phenomena significantly, and are therefore recommended for use as general purpose smoke detectors for early warning of fire in most areas.
